

Data Privacy Compliance Assessment Report

Scope and Methodology

The assessment reviewed governance, data processing, lawful basis, rights, security, retention, third parties, transfers, DPIA and remediation using a fictional evidence set.

Conclusion

The simulated organisation has foundational privacy practices but requires targeted improvements to reach a more mature and consistently evidenced privacy management capability.

Priority Improvements

DSAR workflow, transfer assessments, access reviews, privacy governance and processor oversight.

Limitations

Portfolio simulation; not legal advice, certification or an independent audit.
